POCKET DRIFT

OVERDRIVE

MINIATURE MOTORSPORT. WORKSHOP ATTITUDE.

IN-ENGINE DEVELOPMENT SCENE CAPTURE

v3.1 BETA / PUBLIC RELEASE

NOVEMBER 7, 2026

A miniature arcade racing project set on a workshop bench. Meet the world, the cars, and the creator behind the next stage of development.

CREATED BY CASPER OF BRANDED CREATIONS, 2026

A BIG WORLD ON A SMALL BENCH.

Pocket Drift: Overdrive brings a miniature racing world to a familiar setting: the workshop. Oversized tools establish the scale, while the circuit brings the atmosphere of a motorsport venue.

01 THE WORKSHOP CIRCUIT

Sweeping corners, painted curbs, pit garages, grandstands, and floodlights give the track its identity. Workshop props make the cars feel small without losing the race-day atmosphere.

02 THE DRIVING DIRECTION

The project is built around arcade drifting and combat-racing ideas. Driving feel, race flow, collisions, recovery, and performance are priorities for testing and refinement.

03 THE NEXT CHAPTER

The v3.1 Beta public release is scheduled for November 7, 2026. This packet introduces the project; supported platforms, controls, known issues, and access instructions should accompany the released build.

MEET THE GRID.

Three original stylized car designs. Three distinct visual personalities.

BLENDER STUDIO RENDER / NOT GAMEPLAY

07
SCRAPPER

Red bodywork and a mid-engine GT silhouette.

23
VOLT DOZER

Ivory paint with a fastback profile.

81
NEON VIPER

Teal paint and a long-hood coupe silhouette.

Vehicle handling and balance remain subject to development.

FROM THE CREATOR.

CASPER

BRANDED CREATIONS / 2026

I'm Casper of Branded Creations, the creator behind Pocket Drift: Overdrive. I'm building a miniature racing world and sharing the process as it develops, from car and circuit design to the changes shaped by player feedback.

HELP SHAPE THE NEXT LAPS

When you try the beta, tell us what feels clear, what feels frustrating, and what you would change first. Useful feedback includes:

01 Your build version, device, and input method

02 The issue and the steps needed to reproduce it

03 What you expected and what actually happened

v3.1 BETA PUBLIC RELEASE / NOVEMBER 7, 2026

Download destination to be announced. This packet contains no active download link. Beta software is in development and may change.
